DIGEST

U.S. Agricultural Export Shares By Regions and States, Fiscal Year 1977 (see p. 4).

In fiscal 1977, U.S. exports of farm products set a new record high of \$24 billion. On an October-September basis, the previous high was \$22.76 billion in 1975/76. Gains from the preceding year included oilseeds and products, cotton, tobacco, animal products, fruits, vegetables, and animal feeds. Wheat and corn export values declined. All States had a share in U.S. agricultural exports, but the 10 largest producers accounted for about 60 percent of the total value. State export shares are based on production volume for the various crop and livestock items.

Agricultural Exports Reach New Calendar Year Record In 1977 (see p. 13).

Exports of U.S. farm products set a new calendar year record in 1977, reaching nearly \$23.7 billion, and exceeding the previous year's value of \$23 billion by 3 percent. Although tonnage of principal commodities slipped to 107 million metric tons, due to declines for wheat and coarse grains, higher per unit value items such as cotton and tobacco contributed to the increase in dollar value. The U.S. agricultural trade surplus narrowed to \$10.2 billion from \$12 billion in 1976, because of higher prices for imported tropical products.

U.S. Farm Imports In 1977 Rise 22 Percent From A Year Ago (see p. 58).

In 1977, U.S. farm imports were valued at \$13.5 billion, 22 percent higher than a year ago. Noncompetitive products, mainly green coffee, accounted for most of the rise. Sharply rising import unit prices of green coffee during the first half of the year were the main cause of the increase in value of coffee imports.

International Price Highlights (see p. 82).

In 1977, the composite of prices for farm product exports slipped 1 percent below 1976, due mainly to lower wheat and feedgrain values. Meanwhile, the agricultural import price index rose 8 percent, as coffee and cocoa prices increased sharply.

U.S. AGRICULTURAL EXPORT SHARES BY REGIONS AND STATES, FISCAL YEAR 1977

In fiscal year 1977 (October 1, 1976 through September 30, 1977), U.S. farm product exports totaled a record \$24 billion, 5 percent above similar months the previous year. Increases for oilseeds and products, cotton, tobacco, livestock products, fruits, vegetables, and animal feeds more than offset lower values for wheat and corn. Agricultural exports were equivalent to about 25 percent of cash receipts from farm marketings. In volume terms, crops from nearly 1 out of every 4 harvested acres were exported.

Although all 50 States shared to some extent in the export performance, 10 States accounted for almost 60 percent of the total value. Illinois, Iowa, California, Texas, Indiana, Kansas, Nebraska, North Carolina, Ohio, and Minnesota together accounted for just under 60 percent of the exports.

Five commodity groups were responsible for the bulk of U.S. agricultural exports in fiscal 1977. Feed grains, soybeans, wheat, cotton, and tobacco made up nearly 64 percent of the total agricultural export value.

Feed Grains

Feed grain exports--corn, grain sorghum, barley and oats--amounted to nearly \$5.35 billion during fiscal 1977. Corn Belt States accounted for half of U.S. production, principally Illinois, Iowa, Indiana, and Ohio. Nebraska, Texas, and Minnesota were also important producers. Feed grain exports represent about 25 percent of U.S. production.

Soybeans

Soybeans moved from third the previous year into second place among principal commodity exports during fiscal 1977. Corn Belt States such as Illinois, Iowa, Indiana, and Ohio are large soybean producers. The Delta States are also important, especially Arkansas and Mississippi. Almost half of U.S. soybean production was exported last year (over 15 million metric tons exported out of more than 34 million tons produced). If soybean meal and oil exports are added, close to 60 percent of the soybeans harvested were exported.

Wheat and Flour

Wheat and flour exports fell to third position behind soybeans in fiscal 1977. Lower prices resulted in a wheat export value reduction greater than the volume decline. In fiscal 1977, unmilled wheat export volume dropped 20 percent below that of October 1975-September 1976 to 23.8 million metric tons; value plunged 38 percent to \$2.83 billion. Northern Plains States have the largest stake in wheat exports, accounting for about one-third of the total. Kansas and North Dakota are the principal producers. Montana, Oklahoma, Washington, and Texas are also important wheat growing States. Approximately 44 percent of wheat production was exported during fiscal 1977.

Cotton

Cotton exports amounted to over \$1.5 billion last year. Texas, California, Mississippi, Arizona, and Arkansas are the largest cotton growing States. Cotton

exports exceeded 40 percent of production in fiscal 1977.

Tobacco

The fifth largest farm commodity export during fiscal 1977, tobacco, grossed over \$1 billion from foreign markets. Leading U.S.-producing States are North Carolina, Kentucky, South Carolina, and Virginia. In fiscal 1977 approximately one-third of all tobacco grown was exported.

Methodology

The values for U.S. agricultural exports shown for the States should not be interpreted as actual measurements of state origins of national exports. It is difficult to accurately identify state origins for exported commodities. Wheat, for example, may pass through several storage points before it is actually exported--losing its identity of origin in the process.

The values shown in this report should be regarded as reflecting the common shares of the States in national exports. To the extent that the nation benefits from the export of a commodity, benefits accrue to all producers of that commodity even though relatively more of the production of the commodity from a given (coastal) state may be exported than from a non-coastal state.

Since limited records are available on shipments between States, the statistics on exports by states were based on domestic shares for the identifiable commodities according to each State's production. The formula used to determine a State's export share of a commodity was as follows:

$$X = A \times \frac{B}{C}$$

X = State Export share in dollars.

A = Value of each U.S. commodity group exported in fiscal 1977.

B = Commodity volume produced in a State during calendar year 1976.

C = Total U.S. commodity volume produced during calendar year 1976.

Example: U.S. cotton exports in fiscal year 1977 were valued at \$1,538,200,000 (A). U.S. production in 1976 totaled 10,556,600 bales (c), of which Texas' share was 3,258,000 bales (B).

$$\text{Thus: } X = A \times \frac{B}{C} = \$1,538,200,000 \times \frac{3,258,000}{10,556,600} = \$474,719,000.$$

1/ The export shares were derived from the contribution of the states and regions to national output. They do not show actual exports, but instead reflect the common stake of the states and regions in the national export total.

2/ Includes barley, corn, oats, and sorghum grain.

AGRICULTURAL EXPORTS REACH NEW CALENDAR YEAR RECORD IN 1977

During 1977, U.S. farm product exports totaled nearly \$23.7 billion, exceeding the previous record value of \$23 billion in 1976 by 3 percent. Value increases for oilseeds, oilseed products, cotton, tobacco, animal fats, hides, rice, fruits, edible nuts, and prepared animal feeds more than compensated for reductions in value for wheat, corn, pork, and vegetables. The volume of principal agricultural exports totaled about 107 million metric tons, compared with 111 million tons for 1976.

The U.S. agricultural export surplus diminished to \$10.2 billion from \$12 billion the previous year, because farm product imports increased to nearly \$13.5 billion from just under \$11 billion during 1976. Record high prices for imported tropical products such as coffee, cocoa, and tea accounted for much of 1977's record import value.

Soybean exports rose 6 percent, to 16.2 million tons, and their value jumped one-third, to \$4.4 billion. Sunflower seed, peanuts, safflower seed, and flaxseed shipments were also higher. Soybean oil, cottonseed oil, and oilseed meals posted gains from the previous year.

Cotton export volume advanced 30 percent, to nearly 4.5 million bales. The value of cotton exports surged 46 percent, to over \$1.5 billion. Most of the increase in shipments went to Korea, Japan, Taiwan, Hong Kong, Thailand, and Canada. Egypt took 110,000 bales, and 54,000 bales went to the Peoples Republic of China, compared with none in 1976.

Tobacco exports (including bulk smoking types) moved up 8 percent, to 290,000 tons; value advanced 18 percent to \$1.1 billion. Japan, the largest single market, took 21 percent of the U.S. export volume in 1977.

In 1977, the volume of U.S. rice exports approached 2.2 million tons, up 3½ percent from 1976 while the value rose to \$698 million, 11 percent above year-earlier levels. Strong demand in Iran, Indonesia, and Nigeria--all petroleum exporting countries--contributed to the export rise.

During 1977, wheat export tonnage dropped 10 percent, to 23.8 million tons, while lower prices depressed the value by 30 percent, to \$7 billion. Sharply lower shipments to India, Brazil, European Community (EC) members, Morocco, and Romania, more than offset significant export gains to markets such as the U.S.S.R., Iran, Nigeria, Algeria, Portugal, Bangladesh, Mexico, Peru, Indonesia, Tunisia, and Iraq. Movements to other important markets, including Japan, Korea, Egypt, Venezuela, Poland, Israel, Colombia, and Ecuador, showed little change compared with the previous year's rates. Improved crops in many countries during 1977 resulted in reduced global import demand for U.S. wheat, and contributed to the decline in crop prices from 1976 levels. Coarse grain exports--mainly corn--diminished by 6 percent to 48 million tons, reflecting much smaller shipments to the U.S.S.R., Eastern Europe, most EC countries, Spain, and Canada. However, lower foreign exchange rates for the dollar, lower prices, and greater amounts of grain in animal feed rations led to expanded shipments to Japan. Export volume also rose to the United Kingdom, Mexico, Portugal, Korea, Israel, Greece, and Taiwan. Transshipments of corn through northern European ports to East Germany were considerably lower than during 1976.

U.S. FARM IMPORTS IN 1977 RISE 22 PERCENT FROM A YEAR AGO

In 1977, U.S. agricultural imports were valued at \$13.5 billion, 22 percent higher than a year earlier, generally because of price inflation. Noncompetitive products, mainly coffee, cocoa, and tea accounted for most of the value gain.

Import unit prices of green coffee rose sharply from \$1.52 per pound in January to \$2.45 per pound in July 1977, causing green coffee imports to reach nearly \$3.9 billion in 1977 or 29 percent of all farm imports, compared with \$2.6 billion or 24 percent of the total a year ago. However, the volume of green coffee imported declined by 25 percent from the previous year.

In 1977, more than 50 countries supplied the United States with green coffee; however, eight of these provided almost three-fourths of the total volume. Brazil has been the leading supplier. In the last 2 years, about 16 percent of all volume imports of green coffee came from Brazil. However, in the early 1970's, Brazil supplied about 30 percent of the total.

In 1977, higher prices caused value increases for most other tropical imports also, such as bananas, soluble coffee, cocoa beans, cocoa butter, cocoa powder, natural rubber, spices, and tea. Among these products, the largest percentage increase occurred for tea which nearly doubled in value.

In 1977, imports of competitive products were up only 6 percent. Because of winter freezes, the largest increases occurred for fruits and vegetables--chiefly frozen strawberries, canned pineapple, fruit juices, raisins, oranges, melons, and tomatoes. There were smaller value gains for vegetable oils, cheese, tobacco, wine, and malt beverages.

For other competitive imports, small value and volume declines occurred for meat and products, mainly due to the October-November dock strike. Sugar imports fell 11 percent in value, but rose 27 percent in volume as the unit import price fell from \$252 per short ton in 1976 to \$177.

The International Sugar Agreement became provisionally operative on January 1, 1978. The price range established in the agreement is 11 to 21 cents per pound and will be supported by export quotas and stock accumulation and release. ^{1/} The exporting countries have the potential to ship about 17 million tons of sugar in 1978, but the agreement will limit these exports to about 13 million tons. An additional reduction may occur if the price falls below 11 cents.

During the last quarter of 1977, agricultural imports were valued at \$2.9 billion, 3 percent higher than the year-earlier period. Noncompetitive products were valued slightly lower, mainly due to reduced coffee imports, while competitive imports rose by 7 percent.

Although the monthly value and volume of green coffee imports rose during October-December 1977, the quarterly value and volume imported was below the year-earlier

^{1/} For. Ag. Serv., USDA, "Sugar," Dec. 1977, Foreign Agriculture Circular.

period. Among other principal noncompetitive imports, there were quarterly value gains for cocoa beans, cocoa powder, chocolate preparations, and rubber. As unit import prices increased, quarterly volume declines occurred for cocoa beans and powder.

Among competitive products, quarterly value gains occurred mainly for live animals, fresh or frozen beef and veal, fruits, vegetables, tobacco, and sugar. As the unit import price of sugar fell from \$195 per short ton during October-December 1976 to \$174 per ton in the last quarter of 1977, the volume of sugar imported rose much more than the value of imports.

In anticipation of increased sugar import duties, December sugar imports jumped to \$185 million, more than double the previous month and far above any other monthly value in over a year. A record 1 million short tons was imported compared with usual monthly levels of less than 600,000 short tons.

There were also declines in value, mainly for imports of pork, vegetable oils, and dairy products. Due to price increases, the volume of imported vegetable oils declined much more than the value.

1/ The Meat Import Act, P.L. 88-482 (1964) provides for quotas on fresh, chilled, or frozen beef, veal, mutton, and goat meat. Fresh, chilled, or frozen boneless beef accounted for more than 90 percent of the import volume in 1970-77. The data in this table include rejections by APHIS inspectors totaling 17.8 million pounds in 1972, 18.4 million pounds in 1973, 9.6 million pounds in 1974, 12.4 million pounds in 1975, 12.9 million pounds in 1976, and 6.0 million pounds in 1977.

2/ Preliminary.

INTERNATIONAL PRICE HIGHLIGHTS

1977 Price Developments

In 1977, U.S. export prices declined 1 percent while import prices rose 8 percent from a year earlier. The influence of faltering wheat and feed grain prices on the U.S. export unit value (price) index offset the influence of rising prices for the fats and oils complex, cotton, and rice. Sharp increases in coffee and cocoa bean prices more than balanced declining sugar prices to drive up the U.S. import unit value (price) index so that it nearly reached the record level of 1975.

Export Commodities

In 1977, the export unit value of wheat declined 22 percent from a year earlier, and fell to \$3.08 per bushel. Record supplies of wheat from the 1976/77 crop year caused wheat prices to decline for their third consecutive year. The estimated 30-million-ton decline in the 1977/78 world wheat crop--caused mostly by the decline in the Soviet grain crop--appears to have taken some of the slack out of the market, so that end-of-year U.S. export unit values showed some strength.

The influence of the two large world coarse grain crops harvested in 1976 and 1977 caused U.S. export unit values for corn and other coarse grains to fall in recent months. As a result, the export unit value of corn declined 13 percent to an average \$2.58 a bushel. Grain sorghum exports averaged at \$2.47 a bushel in 1977, 5 percent lower than corn, and 12 percent lower than in 1976.

Export unit values in the soybean complex rose sharply in the spring months of 1977 because of the shortfall in 1976 soybean production, coupled with India's vast import demand for vegetable oils. However, the record 1977 U.S. crop caused a turnaround in export unit values in the latter part of the year. The 1977 export unit value for soybeans averaged a record \$7.38 a bushel, 25 percent higher than a year earlier. Soybean oil reached 26 cents a pound earlier in the year, while soybean meal reached \$202 a short ton, 22 percent and 25 percent higher respectively than a year ago.

The cotton export unit value made a 12-percent gain to an average of \$344 a running bale. Lower world cotton crops in 1975/76 and 1976/77 boosted U.S. export unit values through 1977, but good growing conditions point to a near record 1977/78 marketing year supply. As a result, monthly export unit values were on the decline in the latter part of calendar 1977.

Milled rice export unit value, averaged 15 cents a pound, 4 percent higher in 1977 than a year earlier. Short crops in the United States, Indonesia, and Thailand had a buoying effect on U.S. export unit values for rice in the latter part of the year.

Inedible tallow, cattlehides, and nonfat dried milk were also priced higher than they were a year ago.

Import Commodities

The effects of coffee production shortfalls caused by the frost during the Brazilian winter of 1975 spanned 1976 and early 1977. The U.S. import unit value for coffee beans--at \$L97 a pound for the year--was double a year earlier. The 1977 cocoa bean

import unit value at \$1.26 a pound increased even more--86 percent from a year earlier.

The pattern of rising prices for cocoa beans, which began in mid-1975, continued unabated throughout 1977 and it was only in November that the tide began to turn. Short 1976/77 cocoa bean crops in Ghana and Brazil, coupled with drawdowns in stocks in consuming regions like the United States and Western Europe, created the situation necessary for record high prices.

In contrast to cocoa, the import unit value for sugar continued to slide in 1977, reaching 8.8 cents a pound, a 30-percent decline from a year earlier. Mounting world sugar stocks, as a result of two consecutive record world sugar crops, dampened sugar prices throughout 1977.

In the livestock complex, total meat production, consumption, and trade in the United States and the EC--the world's largest meat-consuming regions--remained at about the same level seen in 1976 and 1977. This development was reflected in the only slight changes in the import unit values for imported beef and canned hams. The import unit value for fresh and frozen beef and veal, at 57 cents a pound, was 3 percent lower than in 1976; for imported canned hams, at \$1.49 a pound, it was 4 percent lower.

Among other agricultural commodities, imported tomatoes in 1977 had a unit value double the level of a year earlier. Bananas were priced 12 percent higher, while unmanufactured tobacco was 18 percent higher.

Imported rubber and wines were priced only slightly higher than they had been a year earlier.

December Price Developments

In December, export prices for wheat, corn, rice, soybeans, and cotton all made gains. Among import commodities, cocoa beans and crude rubber prices declined, while imported cow meat and coffee prices increased slightly.

The recent strength of U.S. grain prices resulted from the strong early December export demand for wheat, the inclement weather in producing areas, and farmers' holding of grain.

Coffee prices have taken a slight upturn, despite indications that more coffee is headed for the United States from producing countries. The slight strengthening of prices resulted from moderate U.S. roaster demand and the residual tightness in the U.S. market for green unroasted coffee that will persist until the supply-demand relationships change.

Average, i.e., index number 2/			106.8			98.7			108.3
Terms of trade (export index divided by import index)			89.1			102.3			91.0

1/ Unit values were computed from the value and quantity figures published in *Foreign Agricultural Trade of the United States*. Cotton poundages were obtained from

U.S. Bureau of the Census Reports, Supplement to EM 522.

2/ The index numbers are of "Fisher's Ideal" type.

1/ Excludes imports of coconut oil. 2/ Excludes imports of fibers, excl. cotton and jute.

Explanatory Note

U.S. foreign agricultural trade statistics in this report include official U.S. data based on compilations of the Bureau of the Census. Agricultural commodities consist of (1) nonmarine food products and (2) other products of agriculture which have not passed through complex processes of manufacture such as raw hides and skins, fats and oils, and wine. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and in transit through the United States from one foreign country to another when documented as such through U.S. Customs.

EXPORTS The export statistics also exclude shipments to the U.S. armed forces and diplomatic missions abroad for their own use and supplies for vessels and aircraft engaged in foreign trade. Data on shipments valued at less than \$251 are not compiled by commodity and are excluded from agricultural statistics but are reflected in non-agricultural and overall export totals in this report. The agricultural export statistics include shipments under P.L. 83-480 (Agricultural Trade Development and Assistance Act), and related laws; under P.L. 87-195 (Act for International Development); and involving Government payments to exporters through 1974. USDA payments are excluded from the export value. Separate statistics on Government Program exports are compiled by USDA from data obtained from operating agencies.

The export value, the value at the port of exportation, is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port. The country of destination is the country of ultimate destination or where the commodities are to be consumed, further processed, or manufactured. When the shipper does not know the ultimate destination, the shipments are credited to the last country known to him at the time of shipment from the United States. Shipments of certain U.S. grain from Great Lakes ports to Canadian ports are designated as exports to "unidentified countries." Except for Canada, export shipments valued at \$251-\$999 are included on the basis of sampling estimates; shipments to Canada valued at \$251-\$1,999 are sampled.

IMPORTS Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption. Data on shipments valued at less than \$251 are estimated on the basis of a 1-percent sample and are not compiled by commodity. They are excluded from agricultural statistics but are reflected in nonagricultural and overall import totals in this report.

The import value, defined generally as the market value in the foreign country, excludes import duties, ocean freight, and marine insurance. The country of origin is defined as the country where the commodities were grown or processed. When the country of origin is not known, the imports are credited to the country of shipment.

Imports similar to agricultural commodities produced commercially in the United States and others that are interchangeable in use to any significant extent with such U.S. commodities are supplementary or partly competitive. All other commodities are complementary or noncompetitive.

Further explanatory material on foreign trade statistics and compilation procedures of the Bureau of the Census is contained in the publications of that agency.
